

Team Name: sddec21-03

Team Members: Aidan Andreas, Ethan Evans, Max Farver, Nick Landon, Brad Zalasky

Report Period: Feb 1-14

### **Summary of Progress in this Period**

We met as a group twice to discuss what the plan was for the project. During these meetings, we introduced ourselves and became acquainted with each other. We also discussed what languages and frameworks would be used within the project. Also, we began discussing the high-level overview of how we would like the application to work. Then we contacted our point of contact and set up a meeting with Tina Prouty. In the meeting, we discussed the requirements and functionalities for the project.

---

### **Pending Issues**

We wrote an email to set up a meeting with our faculty advisor, Mai Zheng. He has yet to get back to us to set up an appointment with him. No other issues have come up.

---

### **Plans for Upcoming Reporting Period**

During the next two weeks, we will start designing wireframes for our project as a group. We wanted to go this route, so everyone is on the same page in terms of design and also that Tina Prouty can give us insight into what she envisioned for the project. Some group members do not have much experience with the frameworks used and will begin to do independent studies to become more familiar with these topics.
